(Determined by IT Strategic Headquarters on 2008.8.20)

Action Plan for Expanding On-Line Use

(Determined by IT Strategic Headquarters on 2008.9.12)

- 72% online utilization rate or higher to be addressed by FY2013(Selection of important 71 procedures from many administrative procedures)
- Strengthen incentivizing activities (half-discount charges etc.), reducing attached documents to submit
- The procedures whose use rates are very low will be reviewed including stopping their systems as the result

Electronic government implementation plan

e-Government Promotion Plan

- The electronic government implementation plan was determined in CIO Liaison Conference on August 31, 2006 based on Priority Policy Program 2006.
- The program period is 5 years from Fiscal 2006 to Fiscal 2010
- Re-revision following the revision on August 24, 2007

Online utilization promotion from the users' point of view

- ◎ Promotion of measures based on "Online Utilization Enhancement Action Plan" (enhancement of online advantages, usefulness improvement, etc.)
- ◎ Promotion of next-generation administration services beyond the frameworks of country and regions

Operation and system optimization aiming for overall optimization

- ◎ Promotion of electronic processing of administration office work such as electronic settlement
- ◎ Active promotion of operational innovations on internal management processes such as travel expenses and article procurement
- ◎ Establishment of sharing system infrastructure that can be used by the entire government

Improvement in government procurement regarding information systems

- ◎ Promotion of measures based on procurement guidelines

Measures against various issues for overall optimization

- ◎ Reinforcement of measures to ensure information security of electronic government from the planning and designing stages
