

Enhancement of the Government Portal Site "e-Gov"

The e-Application System has been operated at the Government Portal Site "e-Gov" enabling to accept multiple administrative procedures such as applications and reports at the single gateway through Internet.

- ▶ The e-Application Systems in ministries have been integrated to "e-Gov" for one-stop services. Some systems which are not integrated yet are scheduled to be consolidated into "e-Gov" sequentially.
- ▶ The "e-Government Customer Support Centre" is opened to deal with various inquiries on how to use "e-Gov".
